

Age-Friendly University Month Webinar Series

October is Age-Friendly University Month!

San Diego State University is proud to be an Age-Friendly University, joining a global movement that values learning, engagement, and connection across all ages. To celebrate, we're hosting a special webinar series every Tuesday in October.

Join us as we showcase the importance of the Age-Friendly University initiative and highlight the innovative work happening on our campus and beyond. Each week will feature a new topic, fresh perspectives, and inspiring conversations about creating a more inclusive, connected future for all generations.
